 - Renewable Energy
- 
- 

Scope of Services 1.1

Stevedoring services

Our expertise in providing professional services of cargo discharging/loading (mooring hawser pick up, floating hose strings pick up, connection and disconnection at the off tanker manifold during loading and offloading at offshore SBM under the supervision of Mooring/Loading Master) and all other labour services taking place at the offshore terminals and our foreign support gives us the edge in prompt services delivery at all times.

Mooring Services

Greenford Services International Limited is a stevedoring company that provides services for onshore, mainstream, and offshore oil & gas operations. While there is no direct mention of mooring services, stevedoring often involves cargo handling, vessel operations, and port logistics, which may include mooring-related activities.

We are well equipped with experienced captains ideally equipped for mooring and dock service and installations.

Scope of Services 1.2

Crude Oil & Gas Lifting/ Discharge Monitoring

As a professional Crude Oil and Gas Monitoring Agent, we offer effective and reliable monitoring of Crude Oil, LPG, LNG and Condensate at the export loading offshore Catenary Anchored Leg Mooring Terminals (CALM) and discharge of imported Petroleum Products at both the SBM and Jetties, to ascertain the exact quantity of Crude Oil, LPG, LNG, Condensate and Petroleum Products Exported and imported in and out of the country to enable Government collect full amount due from the exportation and importation of these products.

Marine & Operations Services

We design and build coastal structures including jetties, breakwaters and seawalls, we manage projects from conception to completion. Subsea inspection and survey, Underwater construction and repair, Our team provides expert consultancy services for marine and Underwater engineering projects.

Scope of Services 1.3

Port and Harbour Development

We design and construct ports and harbours, Dredging and land reclamation navigation channel design and construction, Terminal and facility design and construction.

Coastal & Environmental Control Services

Under the pollution control perspective, waste is regarded as an undesirable by-product of the production process which is to be contained so as to ensure that soil, water and air resources are not contaminated beyond levels deemed to be acceptable. Greenford Services Int'l Ltd provides an overview of the issues that must be addressed in managing waste, providing a conceptual link to the increasingly important roles of recycling and pollution prevention.

Governments have established standards for acceptable practices for collection, handling and disposal to ensure environmental protection. Particular attention has been paid to the criteria for environmentally safe disposal through sanitary landfills, incineration and hazardous-waste treatment.

Scope of Services 1.4

Freight Inspection/ Clearing Services

Greenford Services International Limited is a customs licensed clearing and forwarding, shipping and logistics company providing an efficient, comprehensive and personal service to clients in the industrial, commercial, maritime sectors, and government agencies.

The company strives to pursue impeccable standards of integrity and is committed to providing the highest possible levels of service to its client through its managements many years of experience in the field of shipping clearing & forwarding and stevedoring.

Analytical Testing Services

Under the pollution control perspective, waste is regarded as an undesirable by-product of the production process which is to be contained so as to ensure that soil, water and air resources are not contaminated beyond levels deemed to be acceptable. Greenford Services Int'l Ltd provides an overview of the issues that must be addressed in managing waste, providing a conceptual link to the increasingly important roles of recycling and pollution prevention.

Governments have established standards for acceptable practices for collection, handling and disposal to ensure environmental protection. Particular attention has been paid to the criteria for environmentally safe disposal through sanitary landfills, incineration and hazardous-waste treatment.

Scope of Services 1.5

Supply Chain Solutions

GREENFORD SERVICES INT'L LTD, through its extensive service provider relationships and sub-contractor management can provide clients with a total logistics package, and is happy to arrange the complete door to door movement of project freight. Should a client require smarter service offerings beyond the 'traditional stevedoring realms', Greenford Stevedores is positioned to manage the entire transport chain responsibility, including customs clearances, thereby fulfilling a huge spectrum of customer needs.

Multimodal Freight Management

To meet customer's requisition, our container handling department is managed by Stevedores who are well experienced in the field of intermodal container handling operations. We have worked on vessels of well-known International, and Local Shipping Companies as well as having several years of experience in the Container Cargo Physical Examination, IMO Label Removal, Damage Check and Reporting, Empty Container Sealing, Trans-loading and Export Stuffing.

Scope of Services 1.5

Offshore Support Services

Greenford Services provides logistical and operational support for offshore operations. This includes vessel coordination, crew transfers, supply delivery, and safety compliance to ensure smooth marine activities for oil, gas, and renewable energy projects.

Cargo Surveying

Greenford Services Limited offers professional cargo surveying solutions designed to ensure the integrity, safety, and compliance of goods in transit. Our experienced surveyors provide detailed inspection, verification, and reporting services at every stage—from loading and discharge to damage assessment and loss prevention. With a commitment to accuracy and reliability, we support clients in minimizing risks and ensuring cargo quality across domestic and international supply chains.

Scope of Services 1.6

Renewable Energy

At GREENFORD SERVICES we provide services such as solar, wind, hydro, geothermal, and biomass energy. Solar and wind power have seen major advancements, making them more affordable and widely adopted worldwide. Hydropower remains the largest renewable energy source, while geothermal and bioenergy provide additional sustainable options. we also design, construct and install offshore wind turbines, Maintenance and repair of existing wind turbines, Tidal and wave energy conversion systems, Marine engineering services for solar panels.

Sustainability & Environmental Regulatory Compliance

At **GREENFORD** we recognize the importance of protecting the environment and promoting sustainable practices in our port engineering operations. We are committed to monitoring our ecological footprints ensuring compliance with regulatory requirements and contributing to a healthier and more sustainable future

Sustainability Considerations:

- **Climate change resilience:** Designing ports to adapt to rising sea levels and extreme weather events.
 - **Energy efficiency:** Implementing renewable energy sources, reducing energy consumption, and optimizing lighting systems.
 - **Water conservation:** Minimizing water usage, implementing rainwater harvesting, and reducing wastewater discharge.
 - **Waste management:** Implementing recycling programs, reducing waste generation, and promoting sustainable waste disposal.
 - **Biodiversity conservation:** Protecting marine habitats, preserving natural resources, and promoting eco-friendly practices.

Subject: Technical Partnership – LETTER OF INTENTION (LOI)

Dear Sirs,

Further to our series of meeting, we would like to confirm our interest in supporting GREENFORD SERVICES INTERNATIONAL LIMITED regarding your stevedoring activities.

Transprojets is willing to provide technical support and expertise to your team through:

- PMT – Project Management team
- Legal & Contract supervision
- Technical expertise
- HR management guidelines
- Equipment & accessories selection
- Transfer of competence program

We do have the knowledge and experience to provide GREENFORD SERVICES INTERNATIONAL LIMITED with professional guidelines but also to monitor the work performance and interface with IOC's.

Among our team of expert, Mr. SANANIKONE set up and organize similar technical partnership for SAFEWAY Ports Operators in Bonny Island via Intertrans/Bolloré in 2004. We are also conversant with IOC's argumentation and HSE practice rules which is giving us a global understanding of your line of business and operations.

We remain at your disposal,
Best regards,

Jean-Marc CHATAIGNIER
CEO
